Bath Fittings

The Perfect Blend  
of Form & Flow

Crafted for everyday luxury.

**CASTING**

we maintain a precise brass composition of 58% copper and 41% zinc. A core shooter machine plays a vital role in achieving even wall thickness

**POLISHING**

Seasoned artisans employ three abrasive belt types and four cloth buffs, transforming each piece into a gleaming marvel akin to gold plating.

**MACHINING**

The cast components are brought here to undergo a series of operations, including cutting threads, drilling holes, and creating inlets.

**CHROME PLATTING**

It begins with ultra-sonic cleaning, a ten-minute bath that rids the components of any impurities. Following this, the faucets pass through anodic and cathodic tanks, each taking five minutes, further cleansing and preparing the surface.

**GRINDING**

In our Belt Grinding plant, skilled workers use various tools to carefully craft faucets and bathroom accessories, achieving a smooth finish like gold plating. We prioritize precision, cleanliness, and a safe environment for our artisans.

**QUALITY CHECK**

To validate the faucet's leak resistance, we employ state-of-the-art water-testing machines. Each faucet is meticulously tested to ensure that it remains watertight, guaranteeing that it will perform flawlessly and deliver water without any unwanted drips or leaks.

**WHAT MAKES OUR FAUCETS ONE-OF-A KIND ?**

## FAUCET TECHNOLOGY

COZY introduced advanced technologies, and thanks to more than 29 years of accumulation of technology, COZY's products are easy to use, stable in quality, and efficient in energy. We focus in comfortable use, and at the same time take into consideration of the water-saving and environment protection. Each COZY production represents the perfect combination of technology, quality and design.

**SAVE WATER:**

### WATER SAVINGS - RESPONSIBLE LUXURY

Cutting-edge water maximisation techniques and the finest ideas make your **COZY** experience both responsible and luxurious. You use half the amount of water for twice the amount of fun.

### SAVING WATER

The planet has only 3% fresh water and we help you use that smartly, without compromising on user experience. Because our customers deserve the best life has to offer.

Our flow regulators are designed to regulate and control the flow of water to taps and showers without hampering the performance or the design of the product.

Water is for everyone and every drop counts, which means each one of us has to take care of it and save it.
